Manual
Examination Table

Ritter®
by MIDMARK

What does good value mean to you?

"I want value as I define it: quality equipment that helps me care for my patients. Ritter exam tables provide exactly what I need. They're not only cost effective, but are patient-friendly and provide years of durability. Ritter exam tables make it easy for me and my staff."

204 Manual Exam

Designed in collaboration with experts

What makes Ritter the most purchased brand of exam tables in the industry? It's our willingness to research, study and listen so that we can meet your needs...and the needs of your patients.

We found that you need...

- an exam table that allows easy access for patients, making them feel secure
- three side drawers for optimal supply management
- modern styling to coordinate with your office
- an updated, ergonomic top design to help patients feel comfortable
- additional weight capacity to handle patients of size – 500 pounds

The result of this research? *The Ritter 204 Manual Exam Table*. Featuring the latest in design, comfort and functionality in a manual exam table – it truly offers efficient patient care.

One-Piece Seamless Drawers

One-piece, seamless drawers have easy-to-clean rounded edges and are designed to contain spilled fluids, keeping them from other areas of the table to improve infection control.

***Spacious Side Drawers** - Three spacious side drawers provide plenty of storage volume for gowns, drapes and other items, yet are made to help organize your assortment of smaller supplies and bulk supplies. In addition, there are two front drawers for easy access to items during pelvic exams.*

Examination Table

***Stylish & Easy to Clean** - The ergonomic design of the upholstered top is as soft and comfortable as it looks, leaving your patients feeling more relaxed. The seamless upholstery eliminates areas where dirt and bacteria can accumulate so clean-up is easier, faster and more effective.*

***Removable Top System** - The one-piece, upholstered top can be easily removed without tools, allowing for thorough cleaning or a quick upholstery color change.*

***Enlarged Footstep** - We increased the size of the footstep over 40 percent above the industry standard. This allows patients to feel more secure and get on the table more confidently...putting minimal strain and stress on physicians or their staff.*

***Storage Access and Volume** - Our pass-through side drawers provide access to supplies from either side of the table and give you the ability to change your room configuration when you want to.*

Accessories that add convenience

Assist Handles

Provide patients with secure hand-hold to access the exam table or reposition themselves during an exam. Assist Handles can easily be removed for greater patient access without the need of tools.

Flat Upholstery

Provides an excellent working surface for orthopedic, chiropractic or osteopathic uses.

Adjustable Arm System

Offers patients a stable platform for accessing the table and sense of security during positioning. Arms rotate and lock into one of three possible positions and are removable... all without the use of tools.

Procto Rest

For colon and rectal exams and procedures.

PC Work Surface

Provides an adjustable height workspace for a tablet PC, portfolio or for exam instruments and supplies. Dimensions: Surface area 16-1/2" W x 12-3/4" D and 10" of height adjustment.

Urology Drain Pan

Ideal for urology procedures for fluid and debris removal.

Articulating Knee Crutches

Use a unique ball-socket design allowing a maximum range of adjustment for optimum knee and leg support.

Standard Knee Crutches

Provide leg support for extended procedures where fatigue is a factor or when the patient lacks sufficient leg strength or control. Standard Knee Crutches swivel to adjust for knee and leg support.

Consider a Barrier-Free® table...for your patients and your practice

The days of limited special exam rooms for less-abled patients are gone. With Ritter Barrier-Free tables, more of your exam rooms can be accessible to those with special needs. This not only puts patients at ease, but also makes your practice more efficient.

Of course, your staff will love the Ritter 222 or 223 more than anyone. An examination table that lowers to 18 inches from the floor means they don't have to risk injury from lifting patients. Ease of use and accessibility also mean increased efficiency and an overall increase in patient throughput.
